VIDHYA - An initiative of Neurology Foundation

18th February, 2016

In association with

ASIAN SOCIETY OF CONTINUING
MEDICAL EDUCATION

Neurology Foundation is a Charitable Public Trust established in 1998 by Professor Bhim Singhal. It has been registered under the Bombay Public Trust Act (Registration No. E17626 Mumbai). Neurology Foundation is also accredited by the Maharashtra Medical Council. Neurology Foundation believes in serving the community through its motto **"KNOWLEDGE AND CARE"** Neurology Foundation focuses on reaching out to patients suffering from neurological disorders including Alzheimer's disease, Stroke, Parkinson's Disease, Multiple Sclerosis, Epilepsy and Cerebral Palsy amongst many others.

In addition to providing Individualised financial aid to patients, the Foundation also promotes community outreach programs and education of healthcare workers and families of patients. Educating the medical fraternity, which includes medical students, physicians and neurologists is also an important objective of the Foundation.

Our Work

Neurology Foundation is a registered charitable trust. We at the Neurology Foundation believe in “**KNOWLEDGE & CARE**” and our work encompasses these two ideals through the following projects.

SAHAY

Individual Patient Aid: Through this an endeavour deserving patients are provided individualized support via financial aid.

UPCHAR

The Remedial Programme: The foundation works in partnership with patients and families through intensive rehabilitation which is required for neurological diseases associated with significant morbidities.

AANCHAL

The Community Outreach Programmes: The last decade has seen remarkable advances in the diagnostic and therapeutic abilities of the neurologists. Key diagnostic tests like the scans and advanced blood based tests have become available throughout India.

Unfortunately there are large populations of individuals and communities who are economically challenged and do not have access to these

facilities. There are around 2000 neurologists in the country who need to serve a population of 1.25 billion individuals. Hence we believe that we must reach out to those who cannot avail of such medical services. With this vision in mind, Neurology Foundation embarked on its mission of setting up community out-reach programmes.

- Dharavi outreach project
- B. D. D Chawl, Worli outreach project
- Vasind outreach project
- Kaprada & Dharampur tribal outreach project

VIDHYA

“KNOWLEDGE & CARE”

Knowledge is power and is the stamp of progress in every society. Neurology Foundation encompasses this belief. We strive to achieve this, at all levels. Education of patients and their families is a vital component of comprehensive care. Training programmes for community health workers empowers them to reach out to the deserving. Equally important is our mission to update the knowledge and skills of practicing physicians and neurologists.

Educating the patients: This is done through various centers & outreach groups. The aim is to educate patients about their disease, its implication and the treatment options. Neurology Foundation has conducted awareness sessions on "Neurological Disorders and Healthy Ageing" in various organizations. These sessions include general information about Ageing, Stroke, Dementia and Parkinson's disease. Awareness programmes specially designed for teenagers and children are also being organized in schools of Mumbai.

Educating the care-givers: Neurological disease cause many disabilities and in India the care givers are family members. Through our support groups they are given information & educated regarding their roles in managing their loved ones.

Knowledge for Community Workers: Outreach programs require training of health workers who in turn identify people with neurological diseases. This helps to reach patients rather than wait for them to approach physician.

Neurology Foundation is in discussion with Dr. Keskar, Public Health Department, Municipal Corporation of Greater Mumbai (M.C.G.M) to conduct awareness session for their health workers at all their health posts. Circulars are being sent to the health posts to provide information on these programs. This will enable the patients from the B.M.C health posts to avail of these programs and facilities. Educational sessions with the various health departments are also being planned.

Educating Doctors

Seminars: This is achieved through 3 one-day programs every year where neurologists educate medical students, General Practitioners & Physicians.

Neurology Update Mumbai: Neurology Foundation has been organising continuing medical education meetings called 'Neurology Update Mumbai' once every 2 years since 1196. The faculty includes world renowned International Neurologists & Scientists. These meetings are attended by over 1300 neurologists from all over India. This is aimed at improving the standard of care in the country.

PARVARISH

SUPPORTING SOCIETIES

Various societies assisted by Neurology Foundation

- **Parkinson's Disease and Movement Disorder Society (PDMDS)**
25 support centers; 8720 beneficiaries
 - **Priyadarshni Academy:** Contributes towards scholarships for medical students.
-

- **Multiple Sclerosis Society of India (M.S.S.I):** Contributes to the outreach program of this society as well as provides assistive devices to the needy at the request of the organization.
